

# MANAGEMENT OF RISKS AND COSTS CRITICAL

**From page 29**  
 "As we are more interconnected than ever before, the impact of such risks is increasingly severe. An event happening halfway across the world can disrupt supply chains and impact a local business as was clearly evidenced by the Covid 19 pandemic."

The world is going through a paradigm shift on many levels, and the importance of professional, qualified, and forward-looking advice has become crucial in securing financial security for businesses.

Managing risks and costs is imminently more critical as the inter-connectivity of traditional and emerging risks means that organisations can no longer evaluate individual risks in isolation.

"Our clients benefit from the deep expertise and vast knowledge Minet has to offer. Our team is able to access global skills and capabilities and to deliver locally relevant,

market-leading, and fit-for-purpose solutions to ensure our clients can thrive in today's uncertain times," said Onsando

He said they continue to provide unique solutions and personalised service, ultimately enabling their clients to identify, quantify and manage their risk

exposure and meet the future in more predictable ways."

**MINET FOUNDATION**

Minet established Minet Foundation which was founded to play an active role in improving the lives of the people in the communities in which they operate. The foundation focuses

on education, health care and building sustainable communities and is aimed at making a lasting and measurable impact.

A number of corporate social responsibility projects have been undertaken in last years which include support to St Anthony school of the deaf, Kayabwe among others.

## HOSPITAL TAKES UP MINET COVER FOR TREATMENT

By Olivia Bikala

**W**ebuye County Hospital is now set to serve clients using Minet Medical Insurance Cover. The facility's medical superintendent, Dr Simon Kisaka revealed that a contract to avail services to those clients has officially been signed with the insurance provider.

"We are happy to announce to our clients that the deal is sealed and our professional medics are ready to take up patients with the cover for specialised attention," added Dr Kisaka.

He said the facility has only been admitting clients with National Hospital Insurance Fund (NHIF) cover and those paying in cash. In the new arrangement, teachers will be the biggest beneficiaries of the service since they subscribe to the Minet cover provided by their employer, the Teachers Service Commission (TSC).

He said teachers have been traveling to Bungoma to source for basic medical services where they are covered by their insurance, though the facility offers the services at an affordable rate.

The facility, which won an award by Johnson and Johnson for emerging the best in maternity services, has been ranked the best public health facility in the county.

The award by Johnson and Johnson in conjunction with the Nursing Council recognizes public and mission hospitals for exemplary services despite the many challenges facing public health sector.
